

UPVC DOOR AND WINDOW PROFILES

ALM PLUS

Quality That Lasts. Innovation That Leads

New **embossed** products with high durability

Embossed with a special and beautiful appearance

Featuring a special embossed texture, this design adds a unique and sophisticated touch to the product's appearance perfect for those who appreciate fine details and premium aesthetics.

Unique HOTMELT and NANO Technology

HOTMELT technology is one of the key innovations developed by the company's R&D team. This advancement has significantly improved the structural integrity and durability of the UPVC profiles, ensuring better performance in a wide range of climatic conditions.

Diverse and complete high-quality coloring

Featuring a rich and vibrant color palette with high-quality pigments, ensuring long-lasting beauty and perfect coverage for any application.

Guaranteed long-lasting color stability

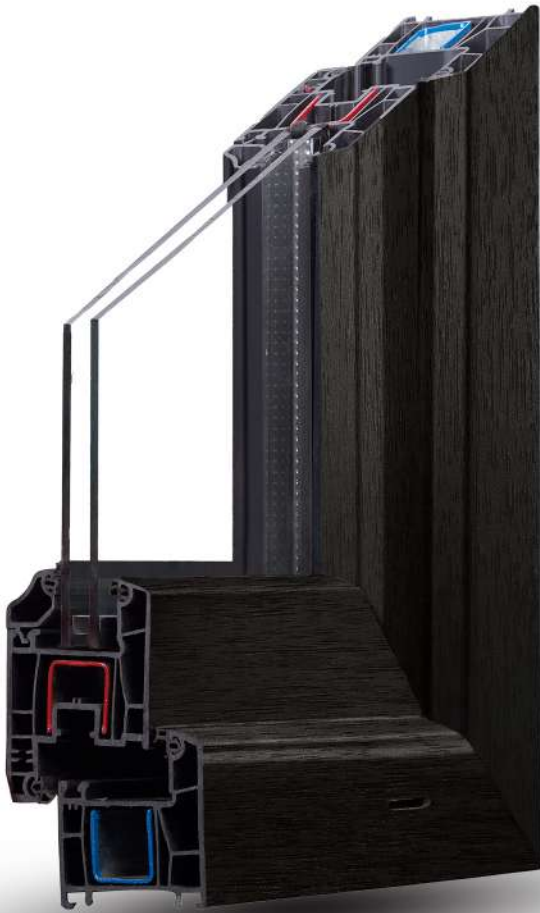

Engineered for exceptional durability, ensuring colors remain vivid and true over time without fading. A perfect choice for lasting beauty and reliability.

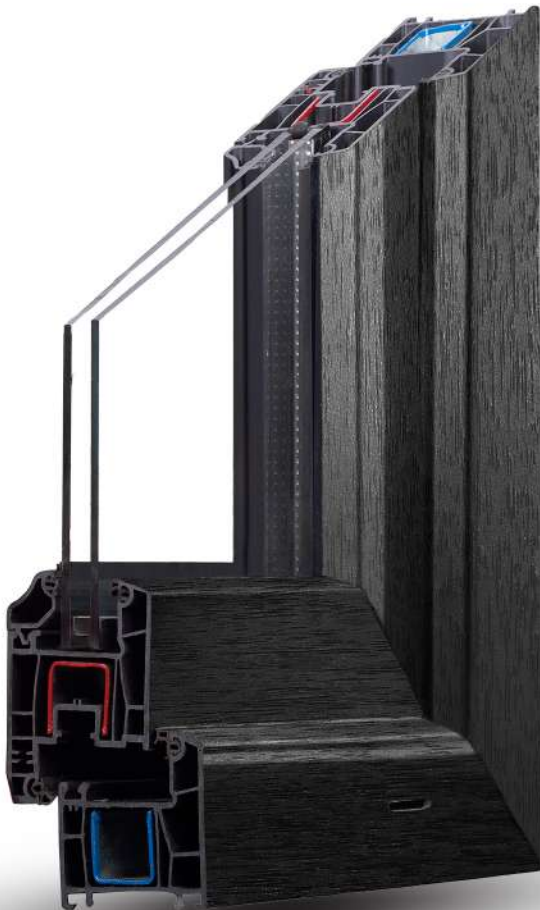

High resistance to scratches and impacts

Designed with a tough, durable surface, offering excellent resistance to scratches and impacts. Ensures long-term protection and a flawless appearance.
