

# WPC DOORS

**ALM PLUS**

Quality That Lasts. Innovation That Leads

**WPC Doors** are made by mechanized manufacturing process, which offers uniform thickness without undulation, warping or bending and a smooth surface for lamination's.

It offers dimensional accuracy and stability in varying humidity and has a high screw holding capacity, high shock and buckling resistance.

Unlike natural wood, WPC is mainly made up of wood compound and plastic that has gone through certain processes which have wood alike finishing.

the beauty of wood and durable synthetic materials. without cellulose which is found in most plants (wood) thus WPC is not appetizing to termites.

WPC boards have more internal strength, weight and above all no tress are cut in their production.

# ■ Products

## Special features

- WPC doors have good flame retardant performance
- Moisture proof
- Colorful variety of appearance and long service life
- Resistant to chemicals and corrosion
- WPC doors are durable and have long service life, and very nice appearance
