

# VINYL SIDING

**ALM PLUS**

Quality That Lasts. Innovation That Leads

# Why Choose Vinyl Siding?

## Low Maintenance

No painting or staining needed

## Durable & Weather-Resistant

Built to withstand harsh climates

## Moisture resistance

## Quick and easy installation

## Energy Efficient Options Available

Add insulation

## Eco-friendly

## Fire resistant

## Impact resistant

## Cost-Effective

Great value with long-lasting performance

# Why ALM Plus

## **Cold pigment & SolarDefense Reflective Technology**

This multi-layer system reflects heat and UV rays to reduce color fading and prevent heat distortion of panels.

## **Wide Color & Texture Options**

Matches any style

## **Premium thickness**

Extra-thick panels (1.5 mm) combined with a specialized locking system that provides resistance to harsh weather, including wind and hail.

## **Realistic Appearance**

Enjoy the lifelike textures and designs, Choose from a wider range of styles and colors, including innovative options like wood-look and urban look.

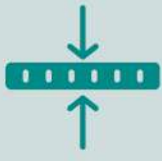

# Wide Color & Texture Options

Matches any style

## Premium thickness

2

Extra-thick panels (1.5 mm) combined with a specialized locking system that provides resistance to harsh weather, including wind and hail.

## Cold pigment & SolarDefense Reflective Technology

This multi-layer system reflects heat and UV rays to reduce color fading and prevent heat distortion of panels.

### Top Layer:

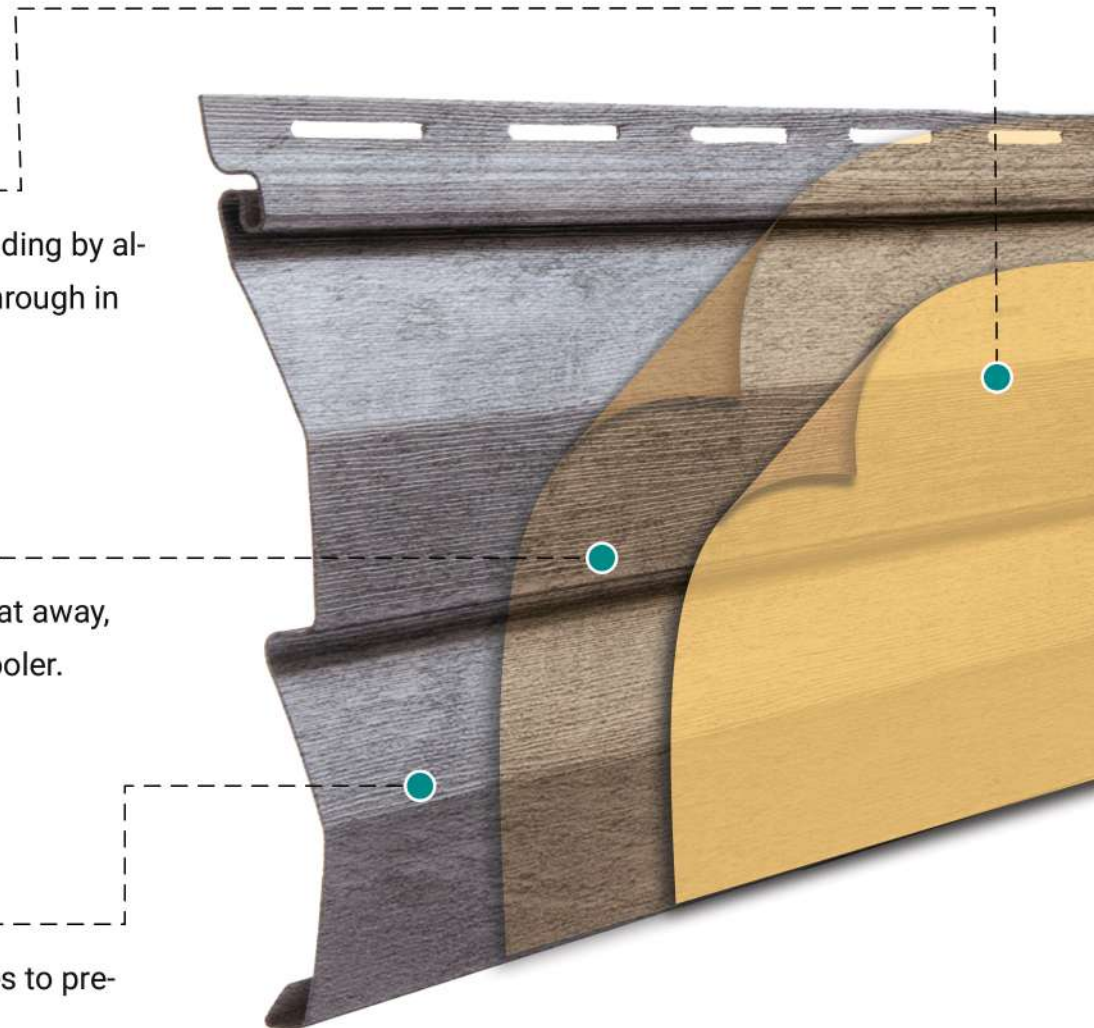

Disperses heat and resists fading by allowing light energy to pass through in both directions.

### Cooling Compound:

Scatters light and reflects heat away, helping to keep the panels cooler.

### Base Layer:

Withstands high temperatures to prevent warping or distortion

## Realistic Appearance

4

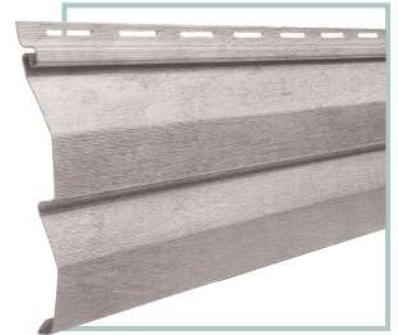

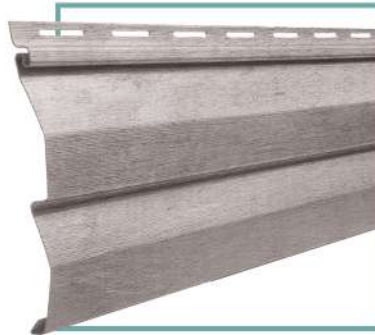

Enjoy the lifelike textures and designs, Choose from a wider range of styles and colors, including innovative options like wood-look and urban look.

Vinyl siding

1 Year

5 Year

**ALM Plus** Vinyl siding

1 Year

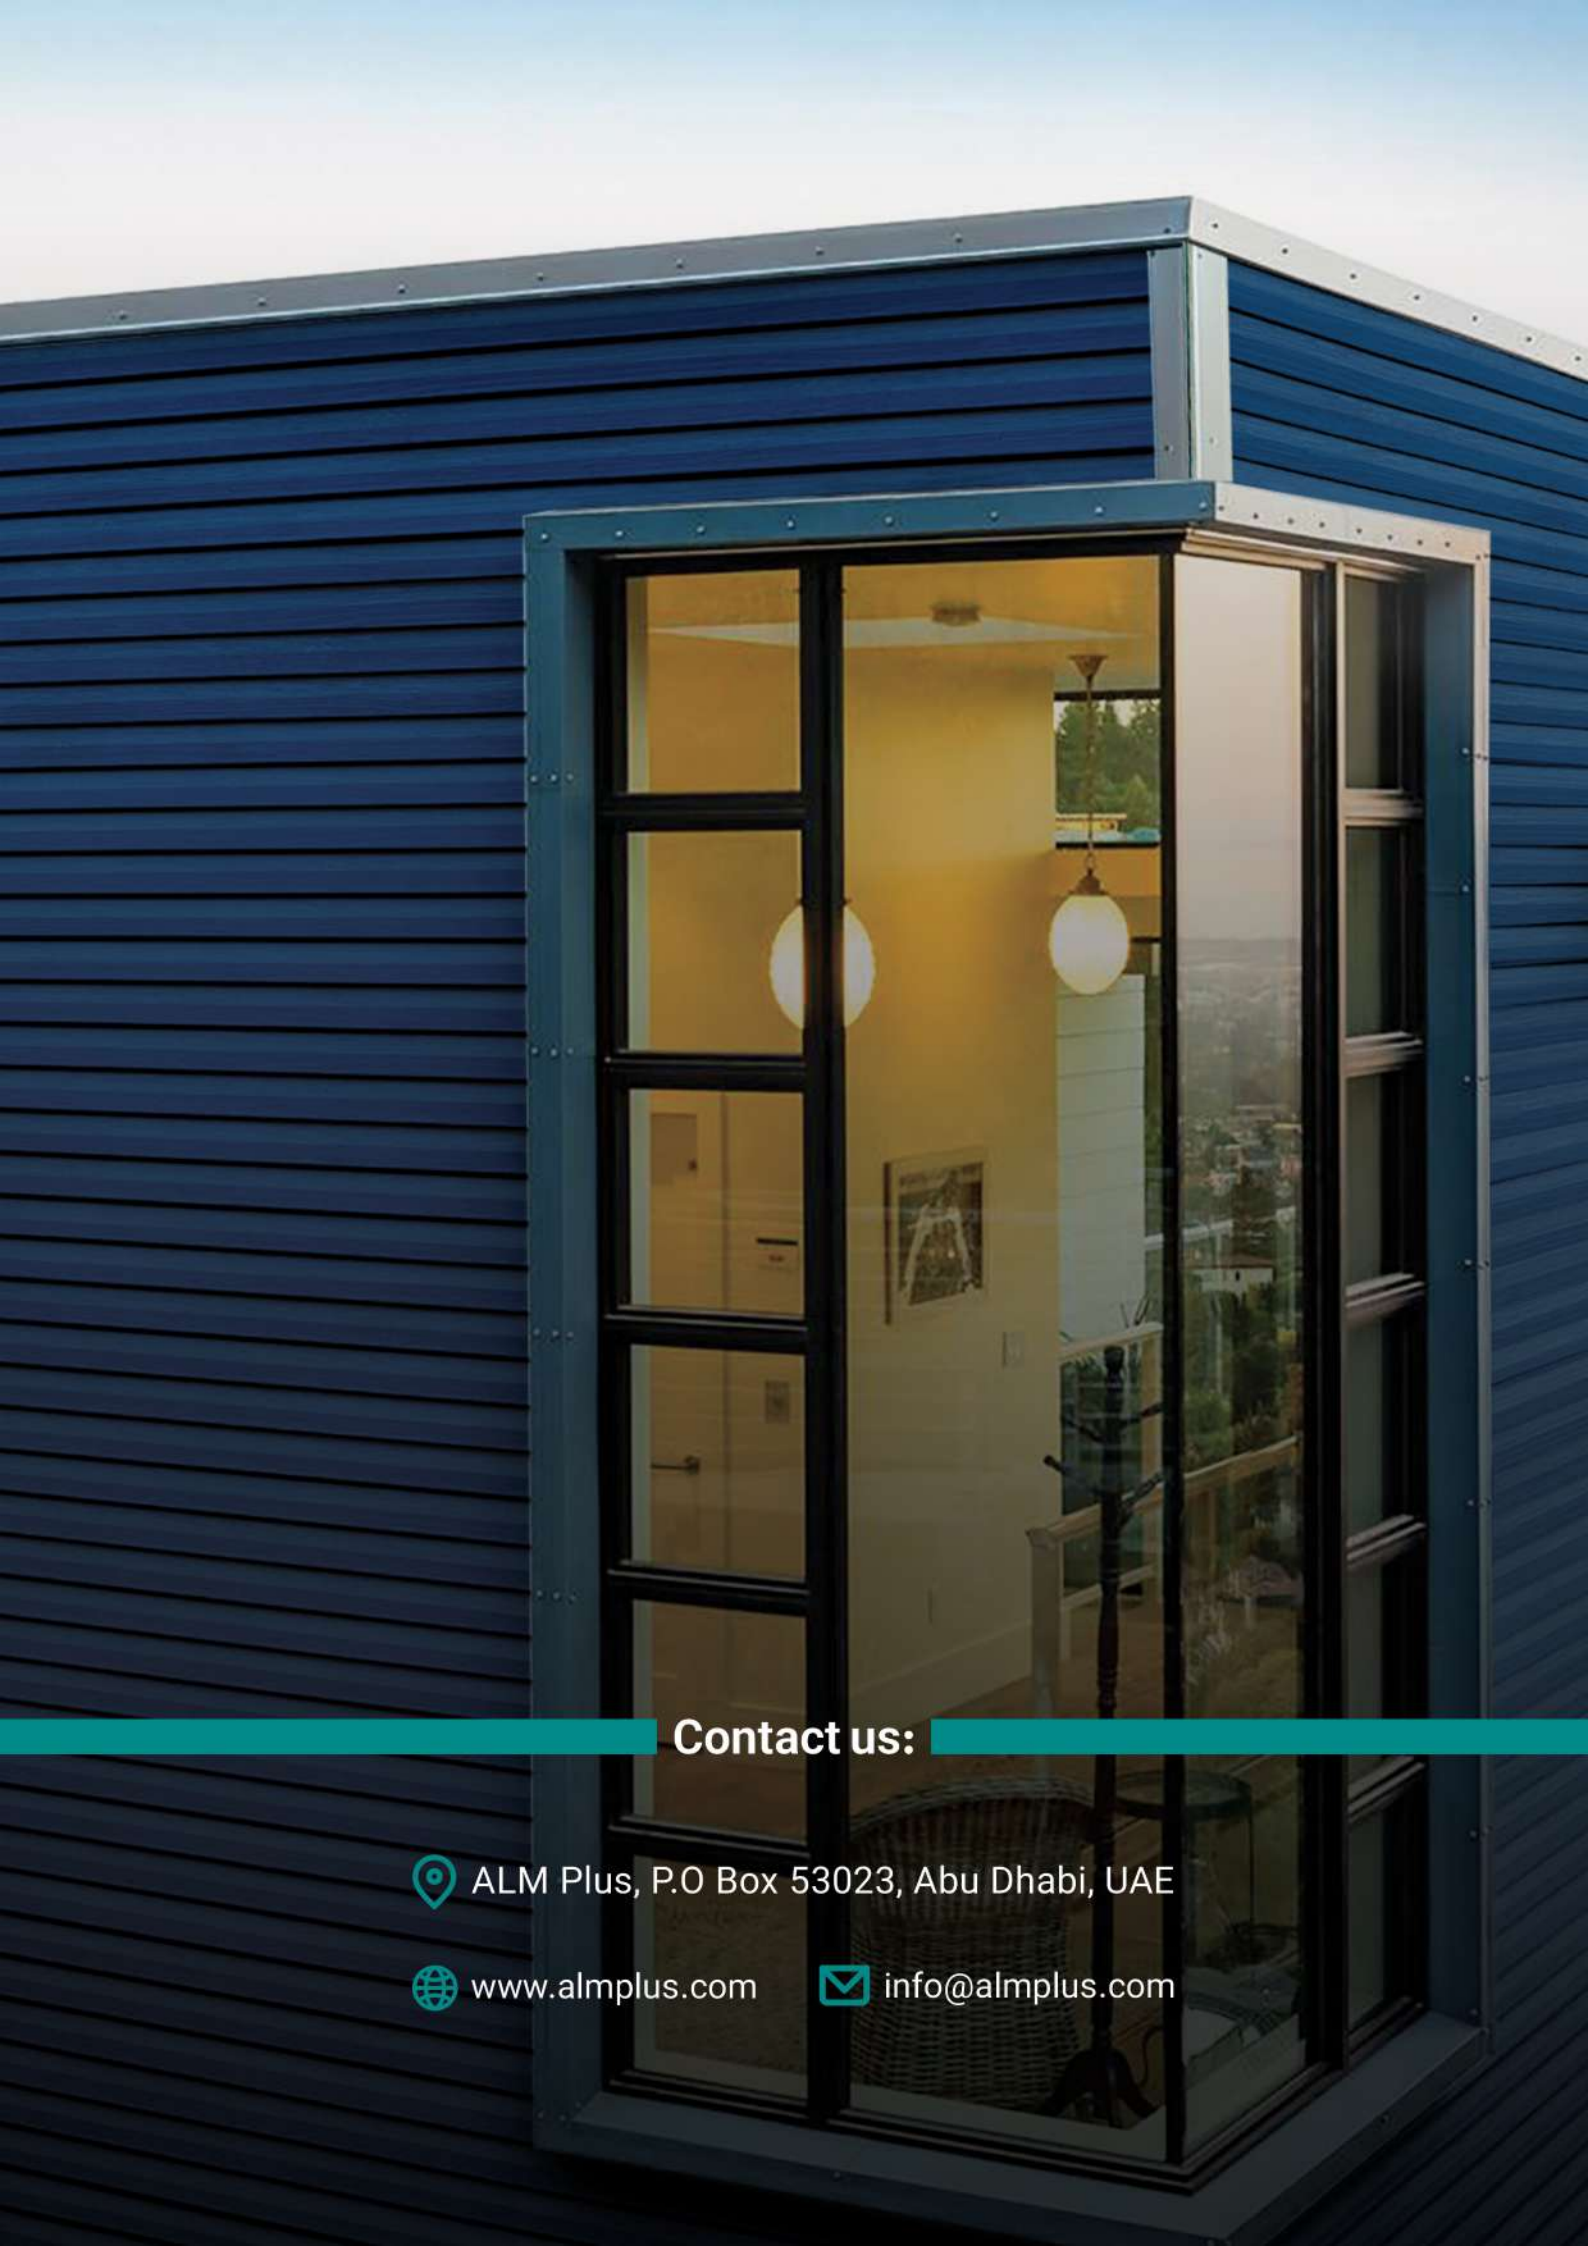

5 Year

## color performance comparison

In just a few months, the damage caused by the sun to standard vinyl siding especially in dark colors becomes obvious. The difference made by Cold Pigment and SolarDefense Reflective Technology is easy to see.

Strength That Lasts - No rotting, no rusting, no worries backed with 25 years warranty
